

How It Works

All vehicles listed are located at established garages across Great Britain (no NI cars).

Prices quoted include customs duty (where applicable), transport costs, VAT and VRT. There are no extra costs on top of the prices listed. A warranty is extra. Our business model allows us to reclaim UK VAT, thus reducing the base on which Irish VAT is charged. We also claim back customs duty where possible. Our service is the most cost-effective way to buy a car from GB.

After Brexit, importing a car from the UK has become more complex, yet there are bargains and greater choice to be had. We provide the know how to keep the benefits of buying from GB without the hassle. You simply collect your new car from us on Irish plates.

STEP 1: Once you have found a car, simply click on '**Place A Deposit**' and your details will be sent to us. No need to pay at this point. We will get in touch and explain the next steps and how to make the deposit.

STEP2: Once we have your €2,000 deposit in place, we then book a fully qualified mechanic to inspect the vehicle. You can view a template of the report next to the **Condition/Mechanical** heading under **DETAILS**. This template will be completed for your car by the mechanic. Once completed, you will receive the report by WhatsApp or email. The report will include photos of any issues with bodywork or the interior. We will follow up any recommendation for repairs from the report with the garage. A history check is also completed. If the mechanics report is not up to your standard, we will return your deposit minus €295 for the cost of the mechanical inspection.

STEP 3: Once you are happy to proceed then we will send on our invoice for payment of the balance of price. Once paid we will purchase the car from the GB garage and follow up on any works agreed with the garage. We then complete customs and transport arrangements and arrange a VRT appointment. We will let you know which documents we require to complete the VRT and register the car in your name.

STEP 4: The whole process takes about 2 weeks. We can offer delivery for a fee or facilitate collection in Dublin. Once VRT is complete, we will forward your new Irish registration and guidance on how to complete payment of your motor tax. Your logbook (vehicle registration certificate), will be posted to you after you pay the motor tax. If you have purchased a warranty then that will be issued on the day of delivery/collection.

Our Guarantee: Your car is guaranteed in that if it arrives and the condition/mechanics are significantly different from the mechanics report in terms of condition or mechanics then we will bring the car back up to the standard of the reports at no cost to you.
